EDUCATION

Bachelor of Science, University of British Columbia, Vancouver, BC

Expected: June 2026

- Combined Major in Statistics, Mathematics & Physics; coursework in Data Science & Analytics, Machine Learning, AI, Linear Programming, Computer Science, Research & Scientific Writing, and Entrepreneurship
- Applied statistical reasoning, data analysis, and research methods across technical projects, building a quantitative foundation for data operations, reporting, and AI-assisted workflows.

WORK EXPERIENCE

MG Builds AI, AI Tools & Workflow Automation Builder, Vancouver

Jan 2026 – Present

- Built AI and workflow automation prototypes using Python, ChatGPT API, Lovable.ai, Base44, Codex, Claude Code, and Cursor — translating unstructured business workflows into repeatable, documented processes
- Designed Python and Power BI dashboards to surface KPIs, flag data anomalies, and deliver clear operational insights to non-technical stakeholders
- Tested and validated AI-assisted pipelines for data cleaning, intake automation, and reporting — reviewing outputs against expected results and documenting discrepancies before deployment

UBC Athletics and Recreation, Thunderbird Park & Stadium Operations Staff, Vancouver

Sep 2025 – Apr 2026

- Coordinated front-line operations for 10+ events per semester serving 500+ daily visitors — managing real-time check-in data, equipment tracking, and schedule adherence across concurrent programs
- Identified recurring operational gaps through pattern recognition across shift reports; proposed process changes that reduced turnaround time and improved handoff consistency
- Maintained accurate records and communicated status updates clearly to staff and stakeholders under high-volume, time-sensitive conditions

University of British Columbia, Vantage College Orientation Leader, Vancouver

Jun – Sep 2025

- Coordinated logistics and information flow across a multi-team, multi-venue schedule for 50+ international students — tracking individual needs, resolving escalations, and maintaining process consistency
- Communicated structured guidance clearly to a linguistically diverse cohort, adapting delivery based on comprehension signals and documenting recurring questions for process improvement

UBC Student Housing, Check-In Assistant, Residence Move-In Day, Vancouver

Aug – Sep 2025

- Processed high-volume check-in data for 7,000+ incoming residents — entering and verifying registration records, package sign-outs, and room assignments with accuracy under sustained operational pressure
- Flagged and resolved data discrepancies in student records in real time, escalating unresolvable mismatches to senior staff while minimizing queue disruption

Golden Wings Structures Pvt Ltd, Wealth Management Project Associate, India

May – Aug 2024

- Reviewed and structured financial data for 15+ client portfolios — translated complex datasets into clear, goal-matched recommendations and presented findings in plain-language reports
- Maintained organized client records and documentation so the team could retrieve accurate account data quickly across all active files

Amway, Independent Business Owner, Vancouver

Sep 2023 – Sep 2024

- Tracked purchasing patterns and customer data across 20+ accounts to refine product recommendations, personalize outreach, and maintain high retention — all while managing a full course load at UBC

PROJECTS

RupiqoAI – AI Finance & Data Workflow Platform

May 2026 – Present

- Building an AI-powered platform to ingest, categorize, and structure financial transaction data — outputting user-facing dashboards and automated insight summaries
- Prototyped end-to-end data intake, validation, and reporting flows using no-code builders and workflow automation; documented data logic, edge cases, and iteration notes for QA

Fashion Trend & Eco-Score Analytics Platform

Sep 2025 – Dec 2025

- Built a Python pipeline to ingest and process fashion product datasets, compute sustainability scores and trend ratings, and output results to Power BI and Tableau dashboards for non-technical users

Scientific Data Analysis, UBC

Sep 2024 – Apr 2025

- Cleaned and analyzed multi-year environmental time-series data in Python — applied detrending, seasonal decomposition, correlation, and variance methods; visualized and presented findings in a class lightning talk

Machine Learning Term Project, UBC Physics & Astronomy

Sep 2024 – Dec 2024

- Executed a full supervised ML workflow — data preparation, feature selection, model training, hyperparameter tuning, and validation on a real dataset; delivered a reproducible codebase with documented results

VOLUNTEERING & ACTIVITIES

Vancouver Housing Market Society (UBC Club), Marketing Associate, Vancouver

Sep 2024 – Sep 2025

- Tracked event engagement data and social media metrics across two semesters; used findings to refine promotion strategy, contributing to a 40% increase in attendance and consistent membership growth

UBC Athletics, Intramural League Official, Vancouver

Sep 2025 – Present

- Officiated 5+ leagues per week — applied rules consistently, managed disputes using structured decision criteria, and maintained accurate game records across a high-throughput schedule

Wize Academy, Teaching Assistant, Vancouver

Nov 2024 – Jan 2025

- Taught coding and 3D modeling to beginner students — structured lesson delivery around clear learning checkpoints, adjusted pacing based on comprehension data, and tracked student progress session to session

SKILLS & INTERESTS

Technical: Python, R, Excel, Power BI, Tableau, SQL (learning), data cleaning, data validation, dashboarding, reporting, time-series analysis, predictive analytics, supervised machine learning, Git

AI & Tools: ChatGPT API, Codex, Claude Code, Cursor, Lovable.ai, Base44, workflow automation, AI prototyping, prompt testing, documentation, Figma

Data Operations: Data entry, data quality assurance, record management, process documentation, KPI tracking, discrepancy checks, stakeholder reporting, operations coordination

Soft Skills: Analytical thinking, attention to detail, customer support, troubleshooting, problem solving, data storytelling, communication, cross-functional collaboration

Interests: Data analytics, AI startups, sustainability and fashion-tech, entrepreneurship
